AC+erm Resource List

The list is divided into a number of sections, each representing a broad category of resource type. The index covers entries under all types except individual publications—books, journal articles, reports, etc—which are laid out in alphabetical order of author (or publishing body, in the absence of a named author).

Sections—Resource Types

Universities, colleges, and educational institutes (e.g. Smithsonian)  
Archives, record offices, and libraries run by national, regional, or municipal government  
Books and publishers  
Journals  
Government agencies (except for archives, records offices, libraries)  
Major non-government bodies with quasi-regulatory, normative or policy development functions, e.g. ISO, DPC  
Organisations and consortia (profit and non-profit)  
Professional recordkeepers’ associations / organizations  
Consultancies  
Individuals—Websites and blogs  
Reports, journal articles and conference papers  
Index

Notes on order of entries:
Organisations or projects are listed in order of full title, though the abbreviation comes first in the entry. However, the index is ordered by abbreviation / acronym.
Universities are generally listed according to location: Glasgow University rather than University of Glasgow. Exceptions are made where the institution is most commonly known in a different order – e.g. University of British Columbia (UBC), University College London (UCL).
National or regional archives / records offices / libraries are listed separately; all other national and local government bodies are listed under the appropriate country. Thus The National Archives, but UK Government – Cabinet Office.
### Education / Research (Universities, colleges, institutes (e.g. Smithsonian))

### DigitalNZ
“DigitalNZ is a collaborative initiative led by the National Library of New Zealand. We work with a wide range of contributing institutions and organisations.”

**Make It Digital**
“Make It Digital is a place for people who are interested in making content digital. New Zealand is a small place with big ideas, and we need to be creating and digitising more content – be it our pictures, our stories, our 3D creations, or our knowledge and culture. Need some advice, got a digitisation project, got some expertise to contribute? This is the place for you.”
[http://makeit.digitalnz.org/](http://makeit.digitalnz.org/)

### EDRM (Electronic Discovery Reference Model)
["an industry group created to develop and establish practical guidelines and standards for electronic discovery" – US]
[http://edrm.net/](http://edrm.net/)

### IDEAlliance (International Digital Enterprise Alliance)
“A not-for-profit membership organization that has been a leader in information technology and publishing since 1966.”

**PRISM specification (Publishing Requirements for Industry Standard Metadata)**
“Defines an XML metadata vocabulary for managing, aggregating, post-processing, multi-purposing and aggregating magazine, news, catalog, book, and mainstream journal content.”
[http://www.idealliance.org/industry_resources/intelligent_content_informed_workflow/prism/about_prism](http://www.idealliance.org/industry_resources/intelligent_content_informed_workflow/prism/about_prism)

### ISOC (Internet Society)
“The Internet Society (ISOC) is a nonprofit organisation founded in 1992 to provide leadership in Internet related standards, education, and policy.”

**IETF (Internet Engineering Task Force)**
“[A] large open international community of network designers, operators, vendors, and researchers concerned with the evolution of the Internet architecture and the smooth operation of the Internet. It is open to any interested individual.”

### KIM (Kompetenzzentrum Interoperable Metadaten)
“an information and communications platform for metadata users and developers on the themes of: - integration of metadata for overlapping applications - national and international metadata standards - alignment of the German-language community with the Dublin Core community” [in German]

Initiatives and resources include:

**KIM / Keßler, M, Haslhofer, B, & Schwarzmaier, M** *Umfragerreport zur Nutzung von Metadaten*
